BILANZ Telekom Rating 2026

Zurich, 27 August 2026 – Cyberlink once again secures two podium places in the BILANZ Telekom Rating 2026: second place in “Datacenter” and third place in “ISP & Corporate Networks”. This is the tenth consecutive year the company has finished on the podium.

Datacenter – 2nd place

In the Datacenter category, Cyberlink improved on last year’s result to take **second place**. With **24.01 points**, the company also achieved the **highest quality score in the entire field (5.08)**, ahead of all national and international competitors. Other strong results: **Support (5.19)** and **Flexibility (4.92)**. A result that underlines Cyberlink’s role as a reliable partner for business-critical infrastructures.

ISP & Corporate Networks – 3rd place

In the ISP & Corporate Networks category, Cyberlink achieved **third place with 23.95 points** – in a field that is closer than ever: less than 0.8 points separate first from third place. **Support (5.35)** is once again among the top scores in the category, confirming what customers have valued most for years: availability, expertise and short lines of communication.

Ten years on the podium, 20 years of participation

Cyberlink has taken part in the BILANZ Telekom Rating since 2007 and has ranked among Switzerland’s leading providers ever since. Over the past ten years, the company has finished on the podium every single year – including seven first places and the double win in 2024 in the “ISP & Corporate Networks” and “Cloud Services” categories.

This continuity over two decades is no coincidence. It is the result of a consistent focus on technological excellence, the highest service quality and genuine customer proximity.

Congratulations to the winners

Cyberlink warmly congratulates this year’s category winners: Init7 in “ISP & Corporate Networks”, EveryWare in “Datacenter” and iWay in “Cloud Services”. The Swiss ICT market thrives on strong competition and on providers who are willing to be measured by their customers’ judgement.

Quality as the benchmark

“Two podium places in such a hotly contested field – we are delighted. These ratings come from our customers, and that is precisely what makes them valuable. Rankings are never an end in themselves for us; they are a confirmation of our team’s daily work. Our benchmark remains the same as ever: the judgement of our customers in day-to-day business.”

– Thomas Knüsel, CEO, Cyberlink AG

With 98% customer satisfaction and the “swiss hosting” label, the ambition remains unchanged: to provide Swiss companies with infrastructures they can rely on.

About Cyberlink

Cyberlink AG is one of Switzerland's leading providers of **business internet, SCION, corporate networks, datacenter and cloud solutions**. For over 30 years, companies of all sizes have trusted Cyberlink as their partner for business-critical IT infrastructures.
